ABOUT ME

Passionate about computing and technology, I made my professional debut in 2011 at the age of 21 in a large SME, Proximity SA, where I am full stack developer and Designer.

After 2 years of Service companies, I embarked on the big bath! The will to swim alone and rule my own ship! I have created and managed NEOCORP since 2013, whose mission was to foster the development and strengthen the competitiveness of SMEs, SMEs, communities and cooperatives thanks to computer technologies. It was an enriching experience, extremely informative and enabling me to learn a lot I love newness, change, challenges and I am totally open also to share my time between several companies to take advantage and to benefit from a field of experiences and broader solutions for all.

I love life, my country, friends and relations based on the franchise.
